ABOUT ME

Frontend Developer with experience in **React**, **Next.js**, **TypeScript**, and **React Native**, focused on building clean, scalable, and high-performance **web** and **mobile interfaces**. Skilled in **API integrations**, **authentication flows**, **component architecture**, and creating reliable **user experiences**. I adapt quickly to new technologies, enjoy solving **product-focused problems**, and thrive in **collaborative environments** where **code quality** and continuous improvement matter.

EDUCATION

Konya Technical University
Bachelor of Science in Computer Engineering
2020 - 2024 & 3.03/4.0

Gebze Technical University
Master of Business Administration
2025 & Present

LANGUAGES

Turkish — Native
English — B1

WORK EXPERIENCE

Ayasofyazılım - Frontend Engineer Jan 2025 - Dec 2025

- Developed core frontend and mobile features using TypeScript, React, Next.js, and React Native/Expo, delivering stable user-facing screens and admin functionality.
- Built advanced identity verification flows including liveness detection, FaceMatch, OCR/MRZ scanning, and NFC-based passport validation.
- Co-developed the Android Mobile POS system with multi-printer support, invoicing, NFC/MRZ verification, and optimized store workflows.
- Delivered a modern Next.js + Strapi landing page and improved overall UI consistency with reusable component architecture.

BAH Health Point - Computer Engineer Sep 2024 - Nov 2024

- Developed responsive React/Next.js web applications, improving operational efficiency by 20%.
- Standardized the team's Git flow and introduced collaboration workflows to streamline communication.

Architecht - Intern Computer Engineer Dec 2023 - Jun 2024

- Contributed to banking UI development with TypeScript & React.
- Optimized backend operations with .NET and MsSQL, reducing system errors and improving performance.

PROJECTS

Aqua Break — Healthy Hydration Mobile App ↗

- Built a React Native app using Android Foreground Service + Kotlin to track app usage and trigger a full-screen overlay when user-defined limits are exceeded.

Nomad Work — AI Workspace Discovery ↗

- Developed the frontend using Next.js + TypeScript and implemented NLP-based review analysis with Python, NLTK & Scikit-learn.

Algorithm with JS — Open-Source Library ↗

- Created a modular JS library with 20+ documented algorithms.

EnWord — English Vocabulary Trainer ↗

- Created a full-stack vocabulary learning platform with Next.js, TypeScript, Node.js, and MongoDB, featuring daily randomized words, translations, and example sentences.

SKILLS

Frontend: React.js, Next.js, Expo, Tailwind CSS, ShadCN/UI
Backend & DB: .NET, Node.js, Supabase, SQL, MongoDB, FastAPI
Programming: JavaScript, TypeScript, Python, C#
Tools: Git, GitHub, TurboRepo, Vercel, Figma, Strapi
