### ABOUT ME

I am a Frontend Developer specializing in React and Next.js technologies. I develop user-friendly, high-performance, and scalable web interfaces. I also have experience in mobile (React Native/Expo) and backend technologies. I am a software developer who adapts quickly to new technologies, thrives in team environments, and is passionate about product development.

### EDUCATION

#### Konya Technical University

Bachelor of Science in Computer Engineering  
2020 - 2024 & 3.03/4.0

#### Gebze Technical University

Master of Business Administration  
2025 & Present

### LANGUAGES

Turkish Native  
English B1

### WORK EXPERIENCE

#### Ayasofyazılım - Frontend Engineer

Jan 2025 - Present

- Took major responsibility in the **frontend development** of **UpWithCrowd**, a crowdfunding platform, using **TypeScript**, **Next.js**, **Tailwind**, and **ShadCN/UI**, delivering **core functionality** for both the **user-facing site** and the admin panel.
- At **Unirefund**, an international tax free platform, **independently developed** the **high-security identity verification flow (liveness detection, NFC & passport scanning)** and co-built the **Android POS app (Expo/React Native)** with invoicing, **payment**, and **multi-printer integrations** — enabling the platform to **scale globally**.
- Delivered the **Unirefund landing page** with **Strapi** and built a reusable **mobile UI component library**, boosting **development speed** and ensuring **consistent standards** across applications.

#### BAH Health Point - Computer Engineer

Sep 2024 - Nov 2024

- Built **responsive web applications** with **React.js**, **Next.js**, and **Node.js**, streamlining **operational workflows** and delivering a **20% efficiency improvement**.
- Established **Git flow processes**, enhancing team code quality and collaboration.
- Introduced a **Discord-based collaboration hub**, improving communication and **project coordination**.

#### Architech - Intern Computer Engineer

Dec 2023 - Jun 2024

- Enhanced **core banking applications** by developing new **UI features** and fixing critical bugs with **TypeScript** and **React.js**, improving **user satisfaction**.
- Optimized backend operations with **.NET** and **MsSQL**, **reducing system error rates by 25%** and **increasing transaction speed**.
- Gained **fullstack development experience** by contributing to both frontend and backend systems.

### SKILLS

**Frontend:** React.js, Next.js, Expo, Tailwind CSS, ShadCN/UI  
**Backend & DB:** Node.js, Supabase, SQL, MongoDB, FastAPI  
**Programming:** JavaScript, TypeScript, Python  
**Tools:** Git, GitHub, TurboRepo, Vercel, Figma, Strapi

## PROJECTS

### Nomad Work – AI-powered workspace discovery platform [🔗](#)

- Developed with **TypeScript**, **Next.js**, and **Python**, helping remote workers find the best places to work.
- Built **NLP models (NLTK, Scikit-learn)** to analyze user reviews, enabling **70% more accurate recommendations**.
- Designed a clean, **responsive UI** for seamless cross-device usage.

### Socreate App – Social media content assistant [🔗](#)

- Built with **Next.js (App Router)** and **Supabase**, providing **secure authentication**, **session management**, and **personalized content history**.
- Implemented **LLM-powered content generation** and an **analytics module** for X, delivering actionable insights on engagement.
- Designed a **reusable UI system** with **ShadCN/UI** and **Tailwind CSS**, following **Neobrutalist design principles**.

### Algorithm with JS – Open-source algorithm library [🔗](#)

- Published a repository of **20+ algorithms** with **clear explanations** and **real-world examples**.
- Focused on **code readability** and **modularity**, helping developers at different levels learn efficiently.
- Received **positive community feedback** and served as a **learning resource worldwide**.

### MergeBot – GitHub Pull Request Reporting Bot [🔗](#)

- Developed in **JavaScript**, this **bot** fetches **Pull Requests** from a specified GitHub repository within a given date range and outputs them in Markdown format.
- Utilizes the **GitHub API** to retrieve and organize Pull Request data based on repository and date parameters.
- Provides a user-friendly **command-line interface** for easy setup and execution.

### Tail – Open-source toolkit [🔗](#)

- Contributed to an open source project developed by a friend, a METU graduate and PhD candidate in the US. Specifically fixed **footer spacing issues in the frontend using CSS and HTML**, optimizing the page layout and maintaining a **clean, modular codebase**.

### Monorepo – Kampus developer community project [🔗](#)

- Contributed to a project we developed together with my mentor Umut Şirin, who works on Discord, and the members of the Kampus platform he founded. **Developed a Toast component** on the frontend to enhance **user experience** and **created a Storybook test story** (Toast.stories.tsx) for **visual testing** of the component.
